Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

No prior art has been found teaching or suggesting a method for making a nucleic acid molecule comprising applying a primer-adaptor nucleic acid molecule. The first nucleic acid molecule made by the method is complementary to all or a portion of a template and comprises the primer adaptor nucleic acid molecule which comprises one or more ligands and one or more cleavage sites. The template is an RNA molecule. The closest prior art is the reference of Burmer. Burmer discloses that an adaptor with a restriction site is ligated to a first nucleic acid sample and optionally the adaptor may contain a ligand binding end. Further, Burmer discloses that if the first and second nucleic acid fragment are amplified, they are amplified with the primers containing a ligand binding end and a sequence complementary to the adaptors (See column 2, lines 39-48).

Burmer does not disclose using a primer-adaptor nucleic acid as claimed and that a template is an RNA molecule.

The rejection of claim 55 under 35 U.S.C. §112, second paragraph is withdrawn because besides mRNA molecules, there are another RNA molecules which do not have poly A sequence. Thus, the language is clear.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
